

GO GREENER!™

33 MILLION POUNDS
OF GREEN PLASTIC
COULD BE REUSED IN **1** YEAR

Go Greener!™ clamshells are the **latest packaging innovation for organic growers** from Sambrailo Packaging. Made with **100% post-consumer recycled plastic** from clear and green beverage bottles, Go Greener! clamshells will get the **attention of organic consumers** on the retail shelf.

The Go Greener!® product line is growing. Go Greener! clamshells are now available in sizes for strawberries, raspberries, blackberries and tomatoes.

Features & Benefits:

- Green translucent color differentiates organic produce from conventional items and is instantly recognizable by organic consumers on the retail shelf.
- Clamshells are made with 100% post-consumer recycled PET from clear and green beverage bottles.
- Raw materials are processed through an in-line decontamination system, eliminating 99.9% of all contaminants.
- Resulting purity standards comply with U.S. Food and Drug, European Food Safety Authority Commission, Association of Postconsumer Plastic Recyclers, and Canadian Plastics Industry Association regulations required for the re-use of post-consumer recycled PET for direct food contact applications.
- Innovative reuse of green beverage bottles in North America keeps the bottles from going into landfills or being shipped overseas.
- Point-of-sale promotional materials are available for organic growers and specialty retailers.
