

*For over 90 years...*

Sambrailo Packaging has supported the produce industry with numerous innovative packaging solutions. The desire to improve produce-handling methods was what prompted Charles Sambrailo to establish the company in 1923 and continues to drive our product and service offerings today. Growers throughout the Americas count on us for high-quality packaging, responsive customer service, and resource management solutions that can improve their efficiencies and meet their packaging needs.

Our high-quality brands include the patented Mixim® family of integrated clamshell and tray solutions, designed to maximize pallet space and improve cooling, and the RunRite™ clamshells which are engineered for maximum efficiency on high-speed packing lines.

## Integrated Services and Resource Management Solutions

**Product Development and Quality Control:** Our Quality and Innovations team will work with you to evaluate the quality of your current products, recommend solutions for improved efficiency, and then help you establish testing protocols to maintain a high level of productivity and product quality.

**Forecasting and Procurement:** Estimating how much packaging will be needed to handle your output from the field is an ongoing challenge. In response to growers' requests, we can assist you with forecasting and have systems in place to procure product to help you prepare for peak production.

**Product Assembly and Labeling:** With in-house packaging assembly and labeling lines, we can customize packaging and labeling solutions to meet your needs and the demands of your packing operations. We can also design, print and store your labels for you for JIT delivery.

**Inventory Management and Grower Issuance:** With multiple locations throughout California and affiliated operations in Mexico, you'll have peace of mind knowing that we can manage your packaging inventory and deliver it to your packing facility or directly to your fields when you need it.

- 100% Recycled PET Clamshells
- Patented Ventilation for Improved Cooling
- Smooth Sidewalls for Reduced Mechanical Damage
- Lock-tight Closures Resulting in Less Product Loss

- 100% Recycled PET Clamshells
- High-Speed Engineering for Maximum Efficiency
- Wide and Deep Base Resulting in Less Product Spillage
- Lock-tight Closures Resulting in Less Product Loss
